JABATAN KEJURUTERAAN AWAM
SESSION 2:2024/2025
DCC10292 – CONSTRUCTION MATERIALS
(TOPIC 2, 3, 4, & 5)
DURATION: WEEK 14

NAME:	**PROGRAMME:**	
REGISTRATION NO.:	**CLASS:**	
ITEM: MINI PROJECT PRESENTATION (TOPIC 2, 3, 4, & 5)	**MARKS:** **/ 100**	
LEARNING OUTCOME: Present the task given with effective communication skills.	**(A2, PLO9)**	

INSTRUCTION:

You and your team are tasked with a mini project to design a residential building using brick, timber, concrete, and steel. Carefully select and apply these materials based on their specifications, suitability for the building's conditions, and sustainability principles. Provide a thorough explanation for each material choice and detail how they will be used in the construction process.

REQUIREMENT:

Preparation:

- Prepare a presentation slide summarizing your project. You may use Canva or Microsoft PowerPoint.
- Use visual aids such as sketches, digital models, or physical models to highlight key aspects of your idea and design. This will help make complex concepts easier to understand.

Content:

- Clearly explain your material selections and their applications.
- Discuss the construction methods and sustainability impacts.
- Address the cultural, social, and economic impacts of your design.

Defense:

- Be prepared to answer questions and defend your design choices during the presentation.
- Be prepared to explain why each material is the best choice for its specific application in your design
